

LIFE OF THE ENVIRONMENT

PLANT

COMMON NAME: MONOSACCHARIDE | IUPAC NAME: (2R,3S,4R,5R)-2,3,4,5,6-Pentahydroxyhexana;(for -glucose)
FORMULA: $C_6H_{12}O_6$ | MOLAR MASS: 180.16 g/mol

WHAT MAKES PLANTS AMAZING?

PLANTS CREATE THEIR OWN FOOD FROM SUNLIGHT, TALK TO EACH OTHER THROUGH UNDERGROUND NETWORKS, AND SURVIVE WITHOUT A BRAIN OR MUSCLES.

USES AND VALUE

FOOD AND NUTRITION

OXYGEN AND AIR PURIFICATION

MEDICINES

MATERIALS AND INDUSTRY

WELL-BEING

PROPERTIES OF PLANTS

ACTIVE PROPERTIES: ALKALOIDS, PHENOLICS AND FLAVONOIDS, GLYCOSIDES

WATER: MAKES UP OF 8-90% OF A LIVING PLANT'S TOTAL WEIGHT

BASIC ELEMENTS: CARBON, HYDROGEN, AND OXYGEN

RISKS AND SAFETY

SKIN IRRITATION

ALLERGIC REACTIONS

SKIN CONTACT

SPORES

CHEMICAL ENGINEERING CONNECTION

CHEMICAL ENGINEERING APPLICATIONS INCLUDE DESIGNING, OPERATING, AND OPTIMIZING LARGE-SCALE FACILITIES THAT FORM RAW MATERIALS INTO VALUABLE PRODUCTS THROUGH CHEMICAL CHANGES.
