

FEATHER

MORE THAN A COLOR, IT'S ONE OF NATURE'S GREATEST GIFT

COMMON NAME: KERATIN | IUPAC NAME: KERATIN FORMULA: NO FIXED FORMULA | MOLAR MASS: VARIES

WHAT MAKES FEATHERS AMAZING?

FEATHERS COMBINE INCREDIBLE STRENGTH, LIGHTNESS, AND COMPLEX ENGINEERING TO PROVIDE FLIGHT, WARMTH, WATERPROOFING, AND CAMOUFLAGE.

PROPERTIES OF FEATHERS

COMPOSITION: BUILT FROM BETA-KERATIN, A PROTEIN STRONGER AND TOUGHER THAN THE ALPHA-KERATIN FOUND IN MAMMALIAN HAIR.

FLEXIBLE STRUCTURE: COMPOSED OF A CENTRAL SHAFT.

FUNCTIONAL GROUPS: HAS STRONG AMIDE AND CARBOXYLIC FUNCTIONAL GROUPS.

USES AND VALUE

CONSUMER GOODS

TEXTILES

INDUSTRIAL BYPRODUCTS

FASHION INDUSTRY

WEALTH AND STATUS

RISKS AND SAFETY

PATHOGENS

PARASITES

RESPIRATORY ISSUES

AVIAN INFLUENZA

CHEMICAL ENGINEERING CONNECTION

CHEMICAL ENGINEERING IS CONNECTED TO FEATHERS THROUGH THE VALORIZATION, CHEMICAL PROCESSING, AND CONVERSION OF FEATHER KERATIN INTO HIGH VALUE INDUSTRIAL MATERIALS, GREEN ENERGY, AND GREEN SOLUTIONS.
